

BLUE STAR

75 YEARS OF
— COOLING EXPERTISE —

2019
AIR CONDITIONERS
RANGE

NOBODY
COOLS BETTER

At Blue Star, quality is about more than compliance. While every Blue Star product is certified and registered as per prescribed industry norms and regulations, each of them passes one of the most stringent process quality checks in the air conditioning industry. Our commitment to quality further extends to ensure every product is designed, engineered and manufactured for well-trusted reliability and increased durability.

QUALITY

RELIABILITY

DURABILITY

ADVANCED AND SUPERIOR TECHNOLOGY

5⁺

HIGH ISEER AIR CONDITIONERS

Blue Star's **Dynamic Drive Design Technology** is an unique engineering design that ensures the Inverter Split AC achieves higher energy efficiency of 5.2 ISEER, delivering most superior cooling performance.

INTEGRATED AIR PURIFICATION TECHNOLOGY

Advanced breakthrough **Anti-bacterial and Anti PM 2.5 Technology** in Blue Star Air Conditioners effectively kill bacteria and eliminate particulate matter and other pathogens, with 99.99%* efficiency, ensuring comfortable cooling with complete protection from indoor air pollution.

NEXT-GEN VOICE CONTROLLED TECHNOLOGY

Certified by Amazon Alexa[^], Blue Star's Air Conditioners with Voice Controlled Technology can operate on voice command with **voice enabled** devices backed by **Internet of Things (IOT)**. You can also remotely manage cooling or set it for a desired time by controlling your AC from anywhere, using this Smart App.

PRECISION COOLING TECHNOLOGY

Blue Star's Inverter Split Air Conditioners with Precision Cooling Technology ensure that you can set the temperature to any precise figure such as 24.5°C and enjoy comfortable cooling.

DUAL ROTOR TECHNOLOGY

Blue Star Inverter Air Conditioners are designed with Dual Rotor Inverter Compressor resulting in faster cooling, longer durability and quieter operation even in peak summer.

HOT & COOL INVERTER TECHNOLOGY

The air conditioners are designed for all seasons, to provide maximum cooling in summers and maximum comfort in winters.

COMFORTABLE COOLING EXPERIENCE

CLIMATE CONTROL

Instantly sets the most desirable cooling mode for different types of climate.

DUAL USER SETTING PREFERENCE

Allow two users to personalize the AC settings at home, to enjoy the desired cooling experience.

iFeel

Ensures the desired comfort around you, with our in-built sensor in the remote.

SELF CLEAN*

Ensures the AC prohibits accumulation of any kind of moisture, mold or dust within the AC, to deliver clean air.

*Self Clean is a feature that is also available as Health or Auto Clean or Blow Clean function, varies from model to model.

COLD PLASMA TECHNOLOGY

In built Cold Plasma Technology ensures harmful bacteria and other airborne pollutants are trapped, leaving you with clean air to breathe.

4D SWING

Ensure you enjoy a uniform cooling experience

* In Standard Test Conditions, select bacterial type | ^Amazon, Alexa and all related logos are trademarks of amazon.com or its affiliates

QUALITY ASSURANCE

At Blue Star, Quality is at the forefront. Our Quality Policy drives our intent and efforts in the making of Blue Star Air Conditioners. We strive to deliver a world – class customer experience, always. Our Quality Policy is backed by various government and third party agency certifications.

The Promise of a Blue Star Air Conditioner is backed by its Quality

- Stringent process quality checks at all critical stages, including for components
- Stringent reliability tests for products and components
- Critical Process Validation at defined frequency for brazing, run test, foaming, evacuation and refrigerant charging
- Refrigerant system leakage test at various stages of Production
- Performance tests to adhere to BEE and other government regulatory standards by Research & Development Department

World Class In house Manufacturing facility for coil manufacturing with stringent process control

Highly Qualified Technical experts to ensure process adherence during all stages

Stringent Testing for Critical Components

Reliability and Process controls for every product

Designed for High Ambient Conditions - 52°C

Rising temperature across cities in India, coupled with the urban effect makes it challenging for air conditioners to deliver superior cooling. Most of the air conditioners are designed to deliver cooling at 35°C. Blue Star air conditioners are designed to perform at extreme ambient conditions as high as 52°C.

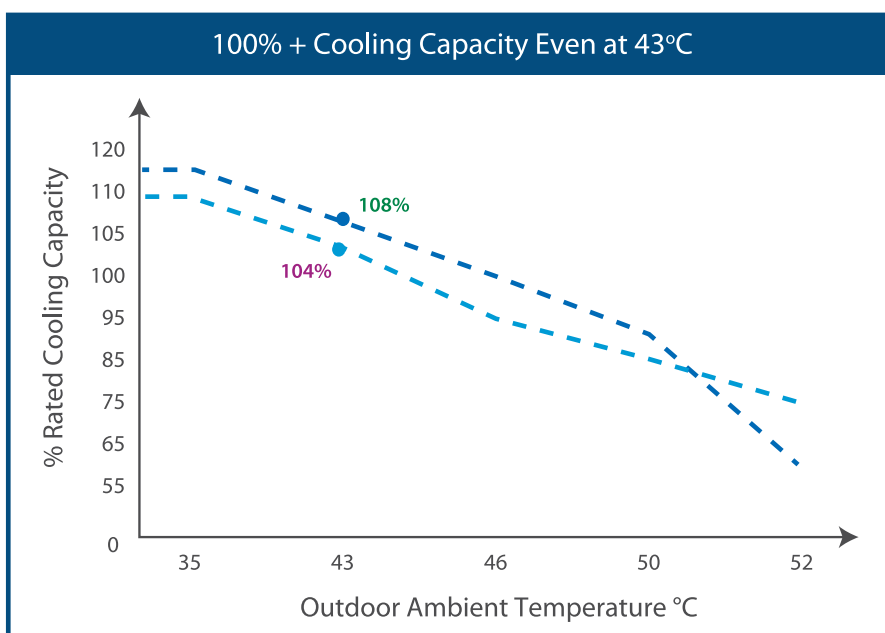

Designed for High Ambient Conditions

Lower Deration Effect

Higher ambient result in the air conditioners cooling system deration, leading to higher power consumption. Blue Star air conditioners have specially designed outdoor units (ODUs) with heat exchange systems to ensure uniform air flow without any obstruction, leading to efficient heat exchange, and higher efficiency.

Blue Star air conditioners ensure 100% cooling capacity[^] even at a higher temperature of 43°C. And, continues to cool even at 52°C with minimal deration

● 1.5 Tr Inverter Air Conditioners

● 1.0 Tr Inverter Air Conditioners

* Image shown above are for visual representation purpose only. [^]100% Cooling Capacity is for 5 Star model Inverter Split ACs.

* Available in select model and capacity

HEAVY DUTY

OUTDOOR UNITS

Blue Star air conditioner outdoor units are designed to perform seamlessly at extremely high ambient conditions, and deliver comfortable cooling even at 52°C.

The 2-row coil condensers* in Blue Star air conditioners outdoor units are 100% copper, precisely designed to ensure maximum efficiency of the cooling system. The heat exchanger compartment systems are designed to ensure uniform airflow without any obstruction, thereby ensuring highly efficient heat exchange, resulting in greater efficiency.

The copper tubes are inner-grooved for high heat transfer, enabling them to deliver the fastest cooling even at extreme ambient conditions of 43°C and above.

Key Highlights of Blue Star Outdoor Units

- Heavy Duty Outdoor Unit designed to cool even at 52°C
- Superior Anti-Rusting Coating to ensure rust-free
- Special Anti-Corrosive Hydrophilic Blue Fin Copper Condenser for more efficient cooling
- Conformal coating on PCBs to protect from dust and humidity
- Weather proof enclosures for critical components for long reliability

Advantages of Heavy Duty ODUs

Faster cooling

Quiet operation

Longer durability

°C

WHEN AC TEMP GOES UP TO **24°C** POWER BILLS GO DOWN UP TO **24%**

It is estimated that by increasing AC temperature by even **1 degree Celsius**, we can save about **6% of electricity**.

HERE'S HOW:

At 24 degrees
Compressor works for **lesser time**. Results in **less power** consumption.

At 18 degrees
Compressor works **longer**. Results in **more power** usage.
